Hobbies

Photography, from passion to job.

Words, both to **read** and to **write**. I have a weakness for **Nordic literature**, from the great Sagas to contemporary authors. I write blog articles and stories.

Gardening and **Botany**, because Earth is my element and Nature is Life for everyone.

Fashion, because a garment or an accessory made with skill is an incredible piece of art.

Interior Design, not an expert but an enthusiast. I love colors, materials and textures: three components with which you can create fantastic worlds.

Swing dance, because improvising is so much more fun.
