PROFILE

Seeing without boundaries...

I am essentially a creative thinker with all the requisite skills needed to bring my concepts and imagination to life. With a classical training in photography, graphic design and which included drawing, print techniques, typography, darkroom and camera techniques and concept generation, I am just as much at home visualising a creative concept, art directing a photoshoot, or photographing and manipulating my own images. I embrace creative challenges that stretch the knowledge and skills I have acquired over the last 15 years.

Equally adept at drawing, painting, illustration and photography I embrace all forms of visual communication.

I am constantly inspired by those I work with and aim to inspire others, in return.
