#### STYLE:

The strong points of my works are the Chromatic expressiveness and Refined details. I define myself as a Neo-symbolist painter, being inspired by the Mysterious, the Spiritual, the Drama, the traditional Virtues and Symbols, Fairy Tales, Legends, Myths, Folklore, Emotions. I share my feelings, thoughts and memories through an artistic language, which follows the Aesthetics from the classical point of view (beauty of the soul and physics). My art does not simply reflect everyday life, but seeks in it the mystical, the value, the perfection... My art enhances beauty, harmony or drama and tragedy in the poetic and intimate sense, deep emotion, morality, natural perfection and that, created by man. My colors, often in various layers of the collage, sink the gaze into a reality - vision, the details of iconographic precision, in metallic shades, create a sense of refinement and luxury. Thus, in my paintings / images, I transform everyday life into a fairy tale image, relaxing or intense, enriched by the exotic lace of ornaments. My works are islands of poetic harmony in contemporary world - reality show.
