

PILI GARCIA ROMOLEROUX

ARTIST

BIOGRAPHY

Born and raised in Quito, Ecuador, I pursued my dream to become an Interior Designer at the University of Florida where I received my Bachelor of Design Degree in Interiors and Architecture. My profession took me all over the world, working for prestigious firms and art inspired unique projects, allowing me the freedom to travel and draw at leisure. After 25 years in this profession, I decided this year to pursue my other dream as an artist.

TECHNIQUE

First I must fall in love with the place, nature and positive energies its people transmit, which in turn ignite the first pen sketches to capture its essence, complimented with photography to understand the perspective and document details which will tell a story. This information is then transmitted into a full drawing, pen on translucent paper which is then photographed and digitally colored, maintaining my original brushstrokes spiced up with vibrant color palettes computer graphics allow. The finished drawing is then suitable for printing in any medium, in particular silk finish fabrics which beautifully reflect the richness and vibrancy of the colors.

IBIZA COLLECTION 2016

For this collection I was inspired in three magical destinations:
Es Vedra, Es Cubells and Pikes Ibiza Rocks House.

I am eternally grateful for the generosity of all my friends who inspired and encouraged me along the way to fulfill my dream which I would like to share and transmit this energy.
peace & love
